

PRIME-BOT — Complete Command Manual

Every slash command in the bot, grouped by system, with exact syntax, what each option means, and who's allowed to use it. "Anyone" means no special permission is required. Where a permission is listed, Discord itself blocks anyone without it — the bot won't even let the command run.

1. Moderation

Command	Syntax	What it does	Permission
<code>/ban</code>	<code>/ban member:@user reason:<text></code>	Bans a member from the server	Ban Members
<code>/unban</code>	<code>/unban user_id:<id></code>	Unbans a user by their Discord ID	Ban Members
<code>/kick</code>	<code>/kick member:@user reason:<text></code>	Kicks a member from the server	Kick Members
<code>/timeout</code>	<code>/timeout member:@user duration:<minutes> reason:<text></code>	Times out (mutes) a member for the given number of minutes	Moderate Members
<code>/untimeout</code>	<code>/untimeout member:@user</code>	Removes an active timeout early	Moderate Members
<code>/warn</code>	<code>/warn member:@user reason:<text></code>	Issues a warning, logged against the member	Moderate Members
<code>/unwarn</code>	<code>/unwarn member:@user</code>	Clears all of a member's warnings	Moderate Members
<code>/warns</code>	<code>/warns [member:@user]</code>	Shows a member's warning count. Leave <code>member</code> blank to check yourself	Anyone
<code>/modlogs</code>	<code>/modlogs</code>	Shows the server's recent moderation action history (bans, kicks, timeouts, warns)	Moderate Members

Auto-Moderation — `/automod`

Subcommand	Syntax	What it does	Permission
<code>/automod status</code>	<code>/automod status</code>	Shows current auto-mod settings	Manage Server

Subcommand	Syntax	What it does	Permission
<code>/automod setup</code>	<code>/automod setup</code>	Guided step-by-step wizard to configure auto-mod from scratch	Manage Server
<code>/automod panel</code>	<code>/automod panel</code>	Posts a button panel to toggle filters on/off	Manage Server
<code>/automod toggle</code>	<code>/automod toggle filter: <name> enabled:<on/off></code>	Turns one specific filter on or off	Manage Server
<code>/automod action</code>	<code>/automod action</code>	Sets what happens when a filter is triggered (e.g. delete, warn, timeout)	Manage Server
<code>/automod mentionthreshold</code>	<code>/automod mentionthreshold</code>	Sets how many @mentions in a single message counts as mention-spam	Manage Server
<code>/automod minaccountage</code>	<code>/automod minaccountage</code>	Auto-kicks new joiners whose Discord account is younger than this (raid protection). Set to <code>0</code> to disable	Manage Server
<code>/automod setlogchannel</code>	<code>/automod setlogchannel</code>	Sets (or clears) the channel that auto-mod and moderation actions get logged to	Manage Server
<code>/automod dashboard</code>	<code>/automod dashboard</code>	Gives a link to configure auto-mod from a web dashboard instead of Discord	Manage Server
<code>/automod bannedword add</code>	<code>/automod bannedword add</code>	Adds a word or phrase to the blocked list	Manage Server
<code>/automod bannedword preset</code>	<code>/automod bannedword preset</code>	Bulk-loads a curated bad-words list into the filter in one go	Manage Server
<code>/automod bannedword remove</code>	<code>/automod bannedword remove</code>	Removes a word or phrase from the blocked list	Manage Server
<code>/automod bannedword list</code>	<code>/automod bannedword list</code>	Lists everything currently blocked	Manage Server
<code>/automod owner</code> (subgroup)	—	Bot-owner-only controls for cleaning up automod reminder DMs the bot has sent	Bot Owner

2. Server Setup & Configuration

Command	Syntax	What it does	Permission
<code>/serversetup</code>	<code>/serversetup</code>	The umbrella guided setup wizard for the bot's main features	Anyone (admin-relevant)
<code>/setup channels</code>	<code>/setup channels</code>	Suggests and creates commonly-useful channels for a new server	Manage Server (implied)
<code>/setup downloadhub</code>	<code>/setup downloadhub</code>	Sets up a channel where anyone can submit music/video links for download	Manage Server (implied)

Welcome Cards — `/welcome`

Subcommand	Syntax	What it does
<code>/welcome enable</code>	<code>/welcome enable</code>	Turns on welcome cards for a chosen channel
<code>/welcome disable</code>	<code>/welcome disable</code>	Turns welcome cards off
<code>/welcome message</code>	<code>/welcome message</code>	Sets the welcome text. Supports placeholders <code>{member}</code> , <code>{guild}</code> , <code>{count}</code>
<code>/welcome colors</code>	<code>/welcome colors</code>	Sets the card's background/accent colors (hex like <code>#2b2d31</code> , or a name like <code>blurple</code>)
<code>/welcome sticker</code>	<code>/welcome sticker</code>	Sets or removes the GIF/sticker shown after the welcome card
<code>/welcome buypack</code>	<code>/welcome buypack</code>	Paid. Buys the premium welcome-card pack (extra looks) once for the whole server
<code>/welcome buyultra</code>	<code>/welcome buyultra</code>	Paid. Buys the Ultra pack, which lets you upload your own image as the card background
<code>/welcome custombg</code>	<code>/welcome custombg</code>	(Ultra pack only) Sets the welcome card background to your own PNG/JPEG
<code>/welcome theme</code>	<code>/welcome theme</code>	Picks which welcome-card visual theme the server uses
<code>/welcome style</code>	<code>/welcome style</code>	Switches the card between an animated sticker or a static image

Subcommand	Syntax	What it does
<code>/welcome setup</code>	<code>/welcome setup</code>	Interactive wizard to set the whole thing up step by step
<code>/welcome preview</code>	<code>/welcome preview</code>	Shows you what the welcome card would look like for you right now

All `/welcome` subcommands need **Manage Server**, except `/welcome preview` which anyone can run.

Reaction Roles — `/reactionrole`

Subcommand	Syntax	What it does
<code>/reactionrole create</code>	<code>/reactionrole create title:<text> description:<text></code>	Posts a new, empty reaction-role panel in the current channel
<code>/reactionrole add</code>	<code>/reactionrole add message_id:<id> role:<role> label:<text> emoji:<optional></code>	Adds a role button to an existing panel
<code>/reactionrole remove</code>	<code>/reactionrole remove message_id:<id> role:<role></code>	Removes a role button from a panel
<code>/reactionrole list</code>	<code>/reactionrole list</code>	Lists every reaction-role panel in the server

Needs **Manage Roles**.

Leveling / XP

Command	Syntax	What it does	Permission
<code>/rank</code>	<code>/rank [member:@user]</code>	Shows your (or someone's) level and XP	Anyone
<code>/leaderboard</code>	<code>/leaderboard</code>	Shows the server's top 10 XP earners	Anyone
<code>/levelrole setup</code>	<code>/levelrole setup</code>	Guided wizard to configure level-up role rewards	Manage Roles
<code>/levelrole add</code>	<code>/levelrole add</code>	Grants a role automatically once a member hits a given level	Manage Roles
<code>/levelrole remove</code>	<code>/levelrole remove</code>	Removes a level-up role reward	Manage Roles
<code>/levelrole list</code>	<code>/levelrole list</code>	Lists configured level-up role rewards	Manage Roles

Command	Syntax	What it does	Permission
<code>/voicexp settings</code>	<code>/voicexp settings</code>	Shows current voice-channel XP settings	Manage Server
<code>/voicexp toggle</code>	<code>/voicexp toggle</code>	Enables/disables voice XP for the server	Manage Server
<code>/voicexp rate</code>	<code>/voicexp rate</code>	Sets how much XP is earned per minute spent in voice	Manage Server
<code>/voicexp afk</code>	<code>/voicexp afk</code>	Sets whether time in the AFK channel counts toward XP	Manage Server

Starboard — `/starboard`

Subcommand	Syntax	What it does
<code>/starboard community</code>	<code>/starboard community</code>	Guided wizard that sets up starboard and suggestions together
<code>/starboard setup</code>	<code>/starboard setup</code>	Sets the starboard channel and the star-count threshold
<code>/starboard emoji</code>	<code>/starboard emoji</code>	Sets which emoji reaction counts toward the starboard
<code>/starboard settings</code>	<code>/starboard settings</code>	Shows current starboard settings
<code>/starboard disable</code>	<code>/starboard disable</code>	Turns the starboard off

All need **Manage Server**.

Tickets — `/ticket`

Subcommand	Syntax	What it does
<code>/ticket setup</code>	<code>/ticket setup</code>	Guided step-by-step wizard to set up the support-ticket system

Needs **Manage Channels**.

Giveaways — `/giveaway`

Subcommand	Syntax	What it does
<code>/giveaway setup</code>	<code>/giveaway setup</code>	Guided wizard to create a giveaway

Subcommand	Syntax	What it does
<code>/giveaway start</code>	<code>/giveaway start prize:<text> duration:<e.g. 1h, 30m, 2d12h> winners:<n></code>	Starts a giveaway directly
<code>/giveaway reroll</code>	<code>/giveaway reroll message_id:<id></code>	Rerolls the winner(s) of an ended giveaway

Needs **Manage Server**.

Scheduled Messages — `/schedule`

Subcommand	Syntax	What it does
<code>/schedule once</code>	<code>/schedule once channel:#chan delay:<e.g. 2h, 30m, 1d> text:<text></code>	Sends a message once, after a delay
<code>/schedule recurring</code>	<code>/schedule recurring channel:#chan interval:<e.g. 1d, 12h, 30m> text:<text></code>	Reposts a message on a fixed interval
<code>/schedule daily</code>	<code>/schedule daily channel:#chan time_utc:<24h UTC, e.g. 09:00> text:<text></code>	Posts a message once every day at a set UTC time
<code>/schedule list</code>	<code>/schedule list</code>	Lists every scheduled message in the server
<code>/schedule cancel</code>	<code>/schedule cancel schedule_id:<#></code>	Cancels a scheduled message (id shown by <code>/schedule list</code>)

Needs **Manage Server**.

Related, standalone command: `/announce channel:#chan message:<text> time:<when>` schedules a one-off announcement; `/announcements` lists them; `/cancelannouncement id:<id>` cancels one. All need **Manage Server**.

Suggestions — `/suggestions`

Command	Syntax	What it does	Permission
<code>/suggest</code>	<code>/suggest text:<text></code>	Submits a suggestion for staff/members to vote on	Anyone
<code>/suggestions log-channel</code>	<code>/suggestions log-channel</code>	Sets the channel approved suggestions get logged to	Manage Server

Invites

Command	Syntax	What it does	Permission
<code>/invites setup</code>	<code>/invites setup</code>	Posts (or re-posts) the invite-tracker setup wizard	Manage Server

Link Buttons — `/linkbutton`

Subcommand	Syntax	What it does
<code>/linkbutton add</code>	<code>/linkbutton add label:<text> url:<https://...></code>	Adds a custom labeled link button (e.g. "Join Our Channel" → a URL)
<code>/linkbutton list</code>	<code>/linkbutton list</code>	Lists the server's configured link buttons
<code>/linkbutton remove</code>	<code>/linkbutton remove label:<text></code>	Removes a button by its exact label
<code>/linkbutton panel</code>	<code>/linkbutton panel</code>	Posts all configured link buttons as a message in the current channel

Needs **Manage Server**.

Autoresponder & Analytics

- `/autoresponder ...` — manage automatic keyword→reply responses. Needs **Manage Server**.
- `/serveranalytics` — snapshot of this server's size, activity, and growth suggestions. Anyone can run it.

Roast / Ship (fun automation)

Command	Syntax	What it does
<code>/setup roastme</code>	<code>/setup roastme</code>	Requests the bot roast a member — needs an admin's approval before it posts
<code>/setup roaststart</code>	<code>/setup roaststart</code>	Manually starts a roast battle immediately, skipping the normal wait
<code>/setup roast</code>	<code>/setup roast</code>	Configures the auto-roast trigger settings for the server
<code>/setup shiptrigger</code>	<code>/setup shiptrigger</code>	Manually "ships" (pairs up) two currently-active members right now
<code>/setup shipconfig</code>	<code>/setup shipconfig</code>	Configures the random shipping feature

Subcommand	Syntax	What it does	Permission
<code>/arena enable</code>	<code>/arena enable</code>	Opts this server into inter-server roast battles	Admin
<code>/arena disable</code>	<code>/arena disable</code>	Opts this server out	Admin
<code>/arena status</code>	<code>/arena status</code>	Shows this server's roast-battle status	Anyone

3. Premium (server monetization)

Command	Syntax	What it does	Permission
<code>/pay</code>	<code>/pay group:<name></code>	Pays to unlock a Premium role in this server	Anyone
<code>/status</code>	<code>/status</code>	Checks your own premium payment status in this server	Anyone
<code>/createpremium</code>	<code>/createpremium ...</code>	Creates a new premium group (name, price, role) for this server	Manage Server
<code>/listpremium</code>	<code>/listpremium</code>	Lists this server's premium groups	Anyone
<code>/premiumadmin</code>	<code>/premiumadmin</code>	Manage premium groups from a dropdown menu instead of typing ids	Admin (implied)
<code>/editpremium</code>	<code>/editpremium group_id:<id> ...</code>	Edits an existing premium group's name/price/role	Manage Server
<code>/togglepremium</code>	<code>/togglepremium group_id:<id> active:<true/false></code>	Enables/disables a group; disabled groups don't show in <code>/pay</code>	Manage Server
<code>/verify</code>	<code>/verify member:@user group: <name></code>	Manually marks someone as paid, bypassing payment	Manage Server

4. Economy & Games

Command	Syntax	What it does	Permission
<code>/economy daily</code>	<code>/economy daily</code>	Claims your daily currency bonus	Anyone

Command	Syntax	What it does	Permission
<code>/economy work</code>	<code>/economy work</code>	Works a shift for currency	Anyone
<code>/economy beg</code>	<code>/economy beg</code>	Begs for spare change	Anyone
<code>/economy balance</code>	<code>/economy balance [member:@user]</code>	Checks your (or someone's) balance	Anyone
<code>/economy leaderboard</code>	<code>/economy leaderboard</code>	Shows the server's richest members	Anyone
<code>/economy coinflip</code>	<code>/economy coinflip amount:<n> choice: <heads/tails></code>	Bets currency on a coin flip	Anyone
<code>/economy rob</code>	<code>/economy rob member:@user</code>	Attempts to rob another member	Anyone
<code>/economy buy</code>	<code>/economy buy item_id:<# from /shop list></code>	Buys an item from the shop	Anyone
<code>/economy vote</code>	<code>/economy vote</code>	Votes for the bot for a currency bonus	Anyone
<code>/economy watchad</code>	<code>/economy watchad</code>	Views a sponsor message for a currency bonus	Anyone
<code>/shop list</code>	<code>/shop list</code>	Lists items available in the shop	Anyone
<code>/shop add</code>	<code>/shop add</code>	Adds an item to the shop	Admin
<code>/shop remove</code>	<code>/shop remove</code>	Removes an item from the shop	Admin
<code>/ecoconfig setup</code>	<code>/ecoconfig setup</code>	Guided wizard to set up the server's economy	Manage Server
<code>/ecoconfig currency</code>	<code>/ecoconfig currency</code>	Sets the currency's name and symbol	Manage Server
<code>/ecoconfig vote</code>	<code>/ecoconfig vote</code>	Configures the vote-bonus mechanic (top.gg-style)	Manage Server
<code>/ecoconfig ads</code>	<code>/ecoconfig ads</code>	Configures the sponsor-embed bonus mechanic	Manage Server

Heist Wars

Command	Syntax	What it does	Permission
<code>/heist</code>	<code>/heist</code>	Opens the Heist Wars operations console — the hub for planning/running heists	Anyone
<code>/inventory</code>	<code>/inventory</code>	Views your Heist Wars inventory	Anyone
<code>/loadout</code>	<code>/loadout</code>	Manage your equipped tools and cosmetics	Anyone

Trading Cards — `/card`

Subcommand	Syntax	What it does
<code>/card daily</code>	<code>/card daily</code>	Claims your free daily card pull
<code>/card pack</code>	<code>/card pack</code>	Buys a card pack with Card Coins
<code>/card inventory</code>	<code>/card inventory</code>	Views your card collection
<code>/card coins</code>	<code>/card coins</code>	Checks your Card Coins balance
<code>/card sell</code>	<code>/card sell</code>	Lists one of your cards for sale on the marketplace
<code>/card listings</code>	<code>/card listings</code>	Views/cancels your active marketplace listings
<code>/card cancel</code>	<code>/card cancel</code>	Cancels one of your marketplace listings
<code>/card watch</code>	<code>/card watch</code>	Notifies you next time a specific card is listed
<code>/card market</code>	<code>/card market</code>	Browses the cross-server card marketplace

All anyone can use.

5. AI Tools

Command	Syntax	What it does	Permission
<code>/aichat</code>	<code>/aichat message:<text></code>	Chats with the AI — anime questions, recommendations, or general conversation	Anyone

Command	Syntax	What it does	Permission
<code>/newchat</code>	<code>/newchat</code>	Starts a fresh AI conversation, clearing prior context	Anyone
<code>/endchat</code>	<code>/endchat</code>	Ends your active AI conversation	Anyone
<code>/aiimage</code>	<code>/aiimage prompt:<text> style:<anime/realistic/3d></code>	Generates an image from a text prompt	Anyone
<code>/aistatus</code>	<code>/aistatus</code>	Checks your daily AI usage	Anyone

AI Store — `/aistore` (paid AI personas)

Subcommand	Syntax	What it does	Permission
<code>/aistore credits</code>	<code>/aistore credits</code>	Checks your AI Store credit balance	Anyone
<code>/aistore topup</code>	<code>/aistore topup</code>	Buys AI Store credits with GHS	Anyone
<code>/aistore newchat</code>	<code>/aistore newchat provider:<name></code>	Starts a new AI Store conversation with a chosen provider/persona	Anyone
<code>/aistore ask</code>	<code>/aistore ask message:<text></code>	Sends a message in your active AI Store conversation	Anyone
<code>/aistore endchat</code>	<code>/aistore endchat</code>	Ends your active AI Store conversation	Anyone
<code>/aistore history</code>	<code>/aistore history</code>	Views your recent AI Store transactions	Anyone
<code>/aistore browse</code>	<code>/aistore browse search:<optional> category:<optional></code>	Browses AI assistant listings	Anyone
<code>/aistore sell</code>	<code>/aistore sell name:<text> description:<text> system_prompt:<text> ...</code>	Lists your own AI persona for sale in the store	Anyone
<code>/aistore mylistings</code>	<code>/aistore mylistings</code>	Views your own AI Store listings	Anyone
<code>/aistore boost</code>	<code>/aistore boost listing_id:<id></code>	Pays to boost a listing's placement	Anyone
<code>/aistore flagbad</code>	<code>/aistore flagbad</code>	Reports your last AI response as broken and requests a refund	Anyone

Subcommand	Syntax	What it does	Permission
<code>/aistore reviewqueue</code>	<code>/aistore reviewqueue action:<approve/reject> listing_id:<id></code>	Reviews listings flagged for human review	Admin
<code>/aistore refundqueue</code>	<code>/aistore refundqueue action:<approve/deny> refund_id:<id></code>	Reviews pending refund requests	Admin
<code>/aistore menu</code>	<code>/aistore menu</code>	Posts a button-based menu for the AI Store as a backup to typing commands	Anyone

6. Media Connect (Plex / Jellyfin / Google Drive)

Command	Syntax	What it does	Permission
<code>/connect subscribe</code>	<code>/connect subscribe</code>	Paid (\$2/month). Subscribes to Media Connect	Anyone
<code>/connect status</code>	<code>/connect status</code>	Checks your Media Connect subscription status	Anyone
<code>/connect jellyfin</code>	<code>/connect jellyfin server_url:<url> api_key:<key></code>	Connects your own Jellyfin server	Anyone
<code>/connect plex</code>	<code>/connect plex</code>	Connects your own Plex server	Anyone
<code>/connect gdrive</code>	<code>/connect gdrive</code>	Connects a Google Drive folder you own	Anyone
<code>/connect disconnect</code>	<code>/connect disconnect source:<which></code>	Disconnects a media source and forgets its credentials	Anyone
<code>/movie search</code>	<code>/movie search title:<text></code>	Searches your connected library	Anyone
<code>/movie play</code>	<code>/movie play item_id:<id from search/library></code>	Gets a private playback link for an item in your library	Anyone
<code>/movie library</code>	<code>/movie library</code>	Lists everything in your connected library	Anyone
<code>/download</code>	<code>/download url:<link></code>	Downloads audio/video from a supported link (e.g. YouTube)	Anyone

Command	Syntax	What it does	Permission
<code>/currency</code>	<code>/currency currency:<code></code>	Sets your preferred display currency for paid features across the bot	Anyone

7. Discovery & Utility

Command	Syntax	What it does	Permission
<code>/discover</code>	<code>/discover</code>	Browses anime by category	Anyone
<code>/search</code>	<code>/search query:<name></code>	Searches for an anime by name	Anyone
<code>/animecategory list</code>	<code>/animecategory list</code>	Lists your saved anime categories	Anyone
<code>/animecategory new</code>	<code>/animecategory new</code>	Creates a new saved anime category	Anyone
<code>/imagesearch</code>	<code>/imagesearch</code>	Reverse image search — finds where an uploaded/linked image is from	Anyone
<code>/news</code>	<code>/news topic:<text></code>	Gets top headlines about a topic	Anyone
<code>/convert</code>	<code>/convert amount:<n> from:<cur> to:<cur></code>	Converts an amount between currencies	Anyone
<code>/stock</code>	<code>/stock symbol:<ticker></code>	Gets a stock's current price and recent change	Anyone
<code>/crypto</code>	<code>/crypto symbol:<coin></code>	Gets a cryptocurrency's current price	Anyone
<code>/alert set</code>	<code>/alert set coin:<id, e.g. bitcoin> price:<usd> direction:<above/below></code>	Sets a price alert for a coin	Anyone
<code>/alert list</code>	<code>/alert list</code>	Shows your active price alerts	Anyone
<code>/alert remove</code>	<code>/alert remove coin:<id></code>	Removes your alert for a specific coin	Anyone
<code>/alert clear</code>	<code>/alert clear</code>	Removes all your alerts	Anyone
<code>/language</code>	<code>/language</code>	Chooses the language the bot replies to you in	Anyone

Command	Syntax	What it does	Permission
<code>/feedback</code>	<code>/feedback message:<text></code>	Sends feedback/a suggestion straight to the bot owner	Anyone
<code>/viewfeedback</code>	<code>/viewfeedback</code>	Views recently submitted feedback	Bot Owner
<code>/help</code>	<code>/help</code>	Shows everything the bot can do, organized by category	Anyone
<code>/invite</code>	<code>/invite</code>	Gets the bot's own invite link so you can add it elsewhere	Anyone

Submissions (catalog)

Command	Syntax	What it does	Permission
<code>/submit</code>	<code>/submit</code>	Submits an anime/movie for the catalog	Anyone
<code>/submissions pending</code>	<code>/submissions pending</code>	Lists submissions awaiting review	Manage Server
<code>/submissions review</code>	<code>/submissions review</code>	Reviews pending submissions from a dropdown	Manage Server
<code>/submissions approve</code>	<code>/submissions approve submission_id:<id></code>	Approves a submission	Manage Server
<code>/submissions reject</code>	<code>/submissions reject submission_id:<id> reason:<text></code>	Rejects a submission	Manage Server

8. Community & Marketplace

Ads — `/ad`

Subcommand	Syntax	What it does	Permission
<code>/ad submit</code>	<code>/ad submit company_name:<> title:<> description:<> ...</code>	Submits an ad for owner approval	Anyone

Subcommand	Syntax	What it does	Permission
<code>/ad status</code>	<code>/ad status ad_id:<id></code>	Checks status of an ad you submitted	Anyone
<code>/ad pending</code>	<code>/ad pending</code>	Lists ads awaiting approval	Bot Owner
<code>/ad approve</code>	<code>/ad approve ad_id:<id></code>	Approves a pending ad	Bot Owner
<code>/ad reject</code>	<code>/ad reject ad_id:<id> reason:<text></code>	Rejects a pending ad	Bot Owner
<code>/ad active</code>	<code>/ad active</code>	Shows currently approved/running ads	Anyone

Marketplace — `/marketplace`

Subcommand	Syntax	What it does
<code>/marketplace list</code>	<code>/marketplace list name:<> title:<> description:<> price_usd:<> category:<></code>	Lists a service you're offering for sale
<code>/marketplace browse</code>	<code>/marketplace browse</code>	Browses active service listings
<code>/marketplace mine</code>	<code>/marketplace mine</code>	Shows your own listings

Referrals — `/referral`

Subcommand	Syntax	What it does
<code>/referral mycode</code>	<code>/referral mycode</code>	Gets your personal referral code
<code>/referral use</code>	<code>/referral use code:<code></code>	Redeems someone else's referral code
<code>/referral stats</code>	<code>/referral stats</code>	Shows your referral count and tracked earnings (tracked only, not a real payout)

Bot Store — `/botstore` (directory of member-submitted bots)

Subcommand	Syntax	What it does
<code>/botstore submit</code>	<code>/botstore submit ...</code>	Submits your bot to the directory

Subcommand	Syntax	What it does
<code>/botstore browse</code>	<code>/botstore browse category:<optional></code>	Browses submitted bots
<code>/botstore trending</code>	<code>/botstore trending</code>	Shows the most-clicked bots in the directory
<code>/botstore mine</code>	<code>/botstore mine</code>	Shows bots you've submitted
<code>/botstore search</code>	<code>/botstore search query:<text></code>	Searches the directory by keyword
<code>/botstore rate</code>	<code>/botstore rate listing_id:<id> stars:<1-5></code>	Rates a bot in the directory

Bots Archive — `/archive`

Subcommand	Syntax	What it does	Permission
<code>/archive enable</code>	<code>/archive enable</code>	Enables the archive system for this server	Bot Owner
<code>/archive submit</code>	<code>/archive submit ...</code>	Submits your bot to the archive by Application ID	Anyone
<code>/archive pending</code>	<code>/archive pending</code>	Shows submissions flagged for manual review	Bot Owner
<code>/archive review</code>	<code>/archive review</code>	Resolves flagged listings from a dropdown	Bot Owner
<code>/archive resolve</code>	<code>/archive resolve listing_id:<id> approve:<true/false> reason:<text></code>	Approves or denies a flagged/disputed listing	Bot Owner
<code>/archive bypass</code>	<code>/archive bypass ...</code>	Force-approves a bot regardless of its risk score	Bot Owner
<code>/archive webhook</code>	<code>/archive webhook ...</code>	Adds, edits, or removes the webhook on your own listing	Anyone
<code>/archive refresh</code>	<code>/archive refresh listing_id:<id></code>	Forces the posted card to re-sync with the current vote count	Bot Owner
<code>/archive trending</code>	<code>/archive trending</code>	Shows the current top bots in the archive	Anyone

Subcommand	Syntax	What it does	Permission
<code>/archive boost</code>	<code>/archive boost listing_id:<id> tier:<></code>	Features your approved listing at the top of the archive	Anyone

Discover Players — `/discoverplayers`

Subcommand	Syntax	What it does
<code>/discoverplayers create</code>	<code>/discoverplayers create ...</code>	Creates a new Discover Players category
<code>/discoverplayers join</code>	<code>/discoverplayers join ...</code>	Joins a category
<code>/discoverplayers browse</code>	<code>/discoverplayers browse category:<optional></code>	Lists categories, or the members of one specific category
<code>/discoverplayers profile</code>	<code>/discoverplayers profile ...</code>	Sets your profile (only shown to mutual matches)
<code>/discoverplayers invite</code>	<code>/discoverplayers invite category:<name></code>	Gets a shareable link to join a category
<code>/discoverplayers challenge</code>	<code>/discoverplayers challenge user:<@user> category:<name></code>	Challenges another member of a shared category
<code>/discoverplayers upgrade</code>	<code>/discoverplayers upgrade category:<name></code>	Paid. Raises a category's member cap

All anyone can use.

9. Owning Your Own Bot (Clones)

Command	Syntax	What it does	Permission
<code>/registerclone</code>	<code>/registerclone token:<your bot token></code>	Registers your own bot token to run it as a clone of this bot (DM only)	Anyone
<code>/myclones</code>	<code>/myclones</code>	Lists the Discord bot clones you own	Anyone
<code>/removeclone</code>	<code>/removeclone clone_id:<id></code>	Deactivates one of your clones (doesn't delete the underlying bot)	Anyone

Command	Syntax	What it does	Permission
<code>/clonemonetize status</code>	<code>/clonemonetize status clone_id:<id></code>	Checks monetization status for a clone you own	Anyone
<code>/clonemonetize activate</code>	<code>/clonemonetize activate clone_id:<optional></code>	Starts or renews monetization on a clone	Anyone
<code>/clonemonetize prices</code>	<code>/clonemonetize prices clone_id:<id></code>	Views the clone's current prices for paid features	Anyone
<code>/clonemonetize setprice</code>	<code>/clonemonetize setprice clone_id:<id> feature:<> amount_ghs:<n></code>	Sets a custom price for one of the clone's paid features	Anyone
<code>/clonemonetize payment</code>	<code>/clonemonetize payment clone_id:<id></code>	Checks where the clone's payments currently go	Anyone
<code>/clonemonetize setpayment</code>	<code>/clonemonetize setpayment clone_id:<id> provider:<></code>	Routes the clone's payments to your own Paystack/Stripe key, or back to the main bot's	Anyone

Managing Bots by Token — `/botmanager`

Subcommand	Syntax	What it does
<code>/botmanager add</code>	<code>/botmanager add token:<token></code>	Registers a bot you own by pasting its token
<code>/botmanager list</code>	<code>/botmanager list</code>	Lists your registered bots
<code>/botmanager view</code>	<code>/botmanager view bot_id:<id></code>	Views details of one registered bot
<code>/botmanager manage</code>	<code>/botmanager manage</code>	Picks a registered bot from a dropdown and manages it
<code>/botmanager setname</code>	<code>/botmanager setname bot_id:<id> username:<2-32 chars></code>	Changes the bot's Discord username
<code>/botmanager setdescription</code>	<code>/botmanager setdescription bot_id:<id> description:<up to 400 chars></code>	Changes the bot's public description
<code>/botmanager setcommands</code>	<code>/botmanager setcommands bot_id:<id> ...</code>	Overwrites the bot's global slash commands

Subcommand	Syntax	What it does
<code>/botmanager remove</code>	<code>/botmanager remove bot_id:<id></code>	Unregisters a bot (doesn't stop the bot itself)

All anyone can use, for bots they own.

10. Owner-Only Commands (bot owner, not server admin)

These only work for whoever owns the main PRIME-BOT deployment — not server administrators.

Command	Syntax	What it does
<code>/admin stats</code>	<code>/admin stats</code>	Bot-wide analytics
<code>/admin guilds</code>	<code>/admin guilds</code>	Lists every server the bot is in, with join dates
<code>/admin submissions</code>	<code>/admin submissions</code>	Reviews pending anime submissions
<code>/admin exportusers</code>	<code>/admin exportusers</code>	Exports all user records as a CSV
<code>/admin envcheck</code>	<code>/admin envcheck</code>	Sanity-checks required environment variables
<code>/admin revenue</code>	<code>/admin revenue</code>	Revenue dashboard across all paid features
<code>/admin subscribers</code>	<code>/admin subscribers</code>	Lists active Media Connect + premium-group subscribers
<code>/admin commissions</code>	<code>/admin commissions</code>	Shows the commission split for monetized clone bots
<code>/admin clones</code>	<code>/admin clones</code>	Manages active Discord bot clones
<code>/ownermonetize</code>	<code>/ownermonetize clone_id:<id></code>	Force-activates monetization on any clone, no payment required
<code>/ownerbroadcast</code>	<code>/ownerbroadcast ...</code>	DMs an announcement to bot users or clone admins
<code>/broadcaststatus</code>	<code>/broadcaststatus id:<optional></code>	Checks whether an <code>/ownerbroadcast</code> actually went out
<code>/autopost setup</code>	<code>/autopost setup channel:#chan interval:<hours></code>	Turns on periodic bot self-promo posts in a channel
<code>/autopost disable</code>	<code>/autopost disable</code>	Turns off periodic self-promo posts
<code>/autopost status</code>	<code>/autopost status</code>	Checks this server's autopost config
<code>/autopostcontent add</code>	<code>/autopostcontent add ...</code>	Adds a post to the autopost rotation library
<code>/autopostcontent list</code>	<code>/autopostcontent list</code>	Lists the autopost content library
<code>/autopostcontent remove</code>	<code>/autopostcontent remove content_id: <#></code>	Removes a post from the rotation

Quick Reference: Where to Start

New server, first time setting the bot up: `/serversetup`

Just want to know what's available: `/help`

Ask the AI in plain English how to do something with the bot: `/aichat` — it knows every command above and will tell you the exact syntax, but it can't run commands for you; you still type the slash command yourself.

Every command's live description and options are also visible in Discord itself — type `/` and start typing the command name to see Discord's own autocomplete and hints, which always match what's documented here.

Nothing above is invented — this is the exact command set defined in the bot's code

(`modules/command_reference.py` plus every cog file). If a command you expected isn't listed, it doesn't exist in this build.
